

Lab 9 - Combine Shapes with Pathfinder and Wrap Text Around a Clipping Path

Topic 02: Basic InDesign Drawing Techniques | LO2 | TGS-2021007827 | v13.0

Combine and subtract shapes using compound paths and the Pathfinder panel, then apply text wrap in all its variants - including wrapping around an object shape derived from a Photoshop path or detected edges - and control the wrap offset so the type never touches the image.
