

# Lab 14 - Evidence Checklist

---

Refine Character and Paragraph Formatting for Readability | LO3 | TGS-2021007827 | v13.0

## File Control

- ☐ I kept HP\_Magazine\_6.indd unchanged.
- ☐ I saved my completed native file as Lab-14-Completed.indd.
- ☐ All linked assets are inside this lab folder or its subfolders.
- ☐ The file opens without an unexpected missing-font or missing-link alert.

## Required Evidence

- ☐ Updated HP\_Magazine\_6.indd
- ☐ Before/after typography screenshot
- ☐ No-overset proof

## Acceptance Gate

- ☐ Headings show even letter spacing at 300% zoom, body copy sits at 10/13, the opening paragraph carries a clean three-line drop cap, and every run-in lead formats itself the moment you type the em dash.
- ☐ I checked for overset text, hidden objects, unintended RGB/spot colours and output settings as relevant to this lab.
- ☐ My screenshots show the full application panel and enough page context for a trainer to verify the result.

## Learner Reflection

What was the most important production decision in this lab?

---

What would you check first if the file failed at handoff?
