

# Lab 15 - Evidence Checklist

---

Build and Apply a House Style Set | LO3 | TGS-2021007827 | v13.0

## File Control

- ☐ I kept HP\_Brochure\_7.indd unchanged.
- ☐ I saved my completed native file as Lab-15-Completed.indd.
- ☐ All linked assets are inside this lab folder or its subfolders.
- ☐ The file opens without an unexpected missing-font or missing-link alert.

## Required Evidence

- ☐ Updated HP\_Brochure\_7.indd
- ☐ Styles panel screenshot
- ☐ Redefine-style before/after proof

## Acceptance Gate

- ☐ Every paragraph in the brochure shows a style name with no plus sign, all four image frames report the 'Product Image' object style, and changing the Body typeface propagates to Body First automatically.
- ☐ I checked for overset text, hidden objects, unintended RGB/spot colours and output settings as relevant to this lab.
- ☐ My screenshots show the full application panel and enough page context for a trainer to verify the result.

## Learner Reflection

What was the most important production decision in this lab?

---

What would you check first if the file failed at handoff?
