

Lab 16 - Import Data and Build a Formatted Price Table

Topic 03: Refine InDesign Drawings | LO3 | TGS-2021007827 | v13.0

Place a tab-delimited data file, convert the text to a table, then control it properly - setting header rows that repeat across frames, adjusting row and column dimensions, applying alternating fills, and locking the presentation into a table style plus cell styles so the next quarterly update is a five-minute job.

Start Here

1. Read ['INSTRUCTIONS.pdf'](#) or the editable ['INSTRUCTIONS.md'](#).
2. Duplicate Tables_A.indd as Lab-16-Working.indd.
3. Keep every supporting asset in this folder so links remain portable.
4. Use ['CHECKLIST.pdf'](#) before submitting your evidence.

Package Contents

File	Purpose
Tables_A.indd	Table starter for imported tab-delimited data, repeating headers and table/cell styles.
TableData.txt	Tab-delimited rate-card data
table-reference.indd	Alternative table exercise
Tables_B-reference.indd	Progression reference
Tables_C-reference.indd	Progression reference
Tables_D-reference.indd	Completed-style reference
Reference.png	Visual reference for the target workflow or result
INSTRUCTIONS.md / INSTRUCTIONS.pdf	Detailed step-by-step learner guide
CHECKLIST.md / CHECKLIST.pdf	Evidence and acceptance checklist

Deliverable

Tables_A.indd containing the imported 2026 rate card as a live InDesign table with a repeating header row, alternating fills, and a saved 'Rate Card' table style plus 'Price Cell' and 'Header Cell' cell styles.

Save the final native file as Lab-16-Completed.indd.

Reference Basis

ACP guide domain 4: create, import, format and style tables that flow with surrounding text. This is supporting practice material, not a claim that this WSQ course is an Adobe certification course.
