

Lab 17 - Evidence Checklist

Add Hyperlinks, Buttons and QR Codes for an Interactive Document | LO3 | TGS-2021007827 | v13.0

File Control

- ☐ I kept HP_InteractiveDoc_A.indd unchanged.
- ☐ I saved my completed native file as Lab-17-Completed.indd.
- ☐ All linked assets are inside this lab folder or its subfolders.
- ☐ The file opens without an unexpected missing-font or missing-link alert.

Required Evidence

- ☐ Updated HP_InteractiveDoc_A.indd
- ☐ Hyperlinks panel screenshot
- ☐ Working button/QR test evidence

Acceptance Gate

- ☐ Every product name opens its store page and the 'Order Now' button changes colour on rollover in the EPUB Interactivity Preview, and a phone camera scanning the QR code opens the WhatsApp ordering line.
- ☐ I checked for overset text, hidden objects, unintended RGB/spot colours and output settings as relevant to this lab.
- ☐ My screenshots show the full application panel and enough page context for a trainer to verify the result.

Learner Reflection

What was the most important production decision in this lab?

What would you check first if the file failed at handoff?
