

Lab 17 - Add Hyperlinks, Buttons and QR Codes for an Interactive Document

Topic 03: Refine InDesign Drawings | LO3 | TGS-2021007827 | v13.0

Turn a static catalogue into a working interactive document: create and manage URL and cross-reference hyperlinks with shared destinations, convert an object into a button with a rollover appearance and a Go To URL action, and generate a live vector QR code directly in InDesign. You then test everything before export.

Start Here

1. Read [`INSTRUCTIONS.pdf`](#) or the editable [`INSTRUCTIONS.md`](#).
2. Duplicate HP_InteractiveDoc_A.indd as Lab-17-Working.indd.
3. Keep every supporting asset in this folder so links remain portable.
4. Use [`CHECKLIST.pdf`](#) before submitting your evidence.

Package Contents

File	Purpose
HP_InteractiveDoc_A.indd	Interactive document starter for hyperlinks, buttons, cross-references and a vector QR code.
Reference.png	Visual reference for the target workflow or result
INSTRUCTIONS.md / INSTRUCTIONS.pdf	Detailed step-by-step learner guide
CHECKLIST.md / CHECKLIST.pdf	Evidence and acceptance checklist

Deliverable

HP_InteractiveDoc_A.indd with every product name hyperlinked to its store URL, a working 'Order Now' button with a rollover state, and a scannable vector QR code on the back page.

Save the final native file as Lab-17-Completed.indd.

Reference Basis

ACP guide domains 4 and 5: interactive elements, accessible link text and output-dependent behaviour. This is supporting practice material, not a claim that this WSQ course is an Adobe certification course.
