

Lab 18 - Evidence Checklist

Animate Objects with Motion Presets and Page Transitions | LO3 | TGS-2021007827 | v13.0

File Control

- ☐ I kept HP_Magazine_7.indd unchanged.
- ☐ I saved my completed native file as Lab-18-Completed.indd.
- ☐ All linked assets are inside this lab folder or its subfolders.
- ☐ The file opens without an unexpected missing-font or missing-link alert.

Required Evidence

- ☐ Updated HP_Magazine_7.indd
- ☐ Timing panel screenshot
- ☐ Interactivity Preview evidence

Acceptance Gate

- ☐ In EPUB Interactivity Preview the three objects animate in the intended order with visible delays between them, the petal follows the drawn curve, and the page transition fires only on the final page.
- ☐ I checked for overset text, hidden objects, unintended RGB/spot colours and output settings as relevant to this lab.
- ☐ My screenshots show the full application panel and enough page context for a trainer to verify the result.

Learner Reflection

What was the most important production decision in this lab?

What would you check first if the file failed at handoff?
