

Lab 19 - Evidence Checklist

Preflight, Package and Export a Print-Ready PDF/X | LO3 | TGS-2021007827 | v13.0

File Control

- ☐ I kept travel_magazine_tutorial.indd unchanged.
- ☐ I saved my completed native file as Lab-19-Completed.indd.
- ☐ All linked assets are inside this lab folder or its subfolders.
- ☐ The file opens without an unexpected missing-font or missing-link alert.

Required Evidence

- ☐ Repaired travel_magazine_tutorial.indd
- ☐ Zero-error Preflight screenshot
- ☐ Packaged folder and PDF/X proof

Acceptance Gate

- ☐ The Preflight panel reports 'No errors' against the Sun Ray Litho profile, the travel-magazine package contains the document, IDML, collected links and available fonts, and the exported PDF/X-1a shows crop marks with artwork bleeding 3 mm beyond the trim.
- ☐ I checked for overset text, hidden objects, unintended RGB/spot colours and output settings as relevant to this lab.
- ☐ My screenshots show the full application panel and enough page context for a trainer to verify the result.

Learner Reflection

What was the most important production decision in this lab?

What would you check first if the file failed at handoff?
