

Lab 20 - Evidence Checklist

Export for Digital Delivery - Interactive PDF, EPUB and Publish Online | LO3 | TGS-2021007827 | v13.0

File Control

- ☐ I kept Little_Red_Hen-anim-after.indd unchanged.
- ☐ I saved my completed native file as Lab-20-Completed.indd.
- ☐ All linked assets are inside this lab folder or its subfolders.
- ☐ The file opens without an unexpected missing-font or missing-link alert.

Required Evidence

- ☐ Interactive PDF and EPUB exports
- ☐ Articles/alt-text screenshots
- ☐ Publish Online or Share for Review evidence

Acceptance Gate

- ☐ The interactive PDF plays its transitions, the reflowable EPUB reflows and reads in the Articles-panel order with alt text intact, the fixed-layout EPUB retains the animation, and the Publish Online and Share for Review links both open with a comment visible in the Comments panel.
- ☐ I checked for overset text, hidden objects, unintended RGB/spot colours and output settings as relevant to this lab.
- ☐ My screenshots show the full application panel and enough page context for a trainer to verify the result.

Learner Reflection

What was the most important production decision in this lab?

What would you check first if the file failed at handoff?
